“URJA” A Future of solar & Electric Vehicles

We at “URJA” are committed to provide world-class services to rapidly developing Economy with the aim of “ऊर्जाबिनाओ, ऊर्जाबिचाओ, पैसाकमाओ”. Our vision is creation of wealth for our stakeholders through the adoption of solar and green energy. Our products in both electric and solar division aim to serve our motto.

Rise in the pollution-related diseases have made us increase our initiatives towards electric vehicles to reduce carbon emissions, reduce climate change and global warming. Our electric vehicles will be a stepping stone towards designing an intelligent, futuristic transport infrastructure which will be capable of catering to the mobility needs of the country's huge population. We have created a unique integrated model to generate energy through solar panels which will be stored in batteries for charging electric vehicles and provide power backup.

With the guidance of 6P's i.e. public, private, progressive, profitable, panchayat and partnership principle, we are currently setting up retail channels for selling our solar, electric and battery products. Keeping in mind our mission to generate sources of livelihood, we are setting up URJA KENDRA in GRAM PANCHAYATS across India wherein students shall be trained in various domains of renewable energy.

We aim to create employment opportunities, transport facilities and support digitization in India with the assistance of our subsidiaries Urja Digital World Ltd, Sahu Minerals & Properties Ltd and Urja Batteries Ltd. We are rapidly scaling our operations throughout various expansion plans as:

- *Business acquisitions supporting our current operations,
- *Collaborating with E-Mitra in Rajasthan for training & incubating towards opening Urja Kendra's.
- *Starting Specialized Business vertical - Franchise Business Model working on Hub & Spoke Model - Opening Exclusive Urja Kendra attached with Block level & Village Level Entrepreneurs
- *Getting associated with Vanvasi Raksha Parivar Foundation for E- Village retail chain

We aim to improve all aspects of performance and reliability and unlock the possibility of producing a solar solution that meet consumers' expectations, helping drive the uptake of electric transport and supporting the Government's 'Road to Zero' strategy – aiming to make road transport emission-free by 2050. Under the able leadership of Mr. Mohan Agarwal, Our Managing Director, Urja is moving beyond compliances and completely reinventing its methods of working. Our shareholders have placed immense trust and confidence in us which is our fuel towards positive growth and higher achievements.

Wish you all a very Happy New Year 2022!
